FOREWORD

Another milestone has been reached in our Seed Division. Established in 1876, we have now reached our 80th year in supplying quality seed Peas, Beans, and Sweet Corn to the Seed Trade, Cannerymen and Freezers.

We maintain our trial grounds and research work for peas and beans at both Idaho Falls and Twin Falls, Idaho. Our peas are produced at both of these points, as well as in the states of Washington and Wyoming. Fordhook Limas and pole snap bean varieties are produced in California. All other bean varieties are grown in Idaho. Sweet corn trials and production are carried on at Caldwell, Idaho. At all of these points new varieties are carefully checked before being released to the trade. Through continuous purelining of all varieties, our customers are assured the finest in quality seed.

The descriptive data, including reference to season or number of days to marketable condition, given for pea and bean varieties has been based on several years experience and observation made in our western seed growing areas. Maturity dates on sweet corn are calculated on basis of midwestern growing conditions. All sieve sizes indicated on peas are from readings made at Idaho Falls and taken on basis of a Tenderometer reading of 100.

Many of our Seed Division customers are now using products supplied by another division of our Company. Thirty-five years ago we entered the field of potato dehydration. At the present time we have dehydrating plants located in Idaho Falls, Idaho, and Grand Forks, North Dakota. The potato flour and dehydrated cubes manufactured in these plants are supplied to bakers, meat packers, soup manufacturers and others. These dehydrated products have met with favor wherever used. Sales office for both Divisions is maintained at Idaho Falls, Idaho.

We sincerely appreciate the business with which you have favored us in the past and hope that it may be our privilege to continue to supply your requirements in the future.

BEANS—BUSH LIMA

CLARK'S BUSH

67 Days

Resembles Henderson Bush in plant and pod but has green cotyledons. It is a heavy yielder. Pods three inch, curved, flat, dark green with three to four beans. Seeds small and mainly pale green.

CANNING & FREEZING VARIETY

FORDHOOK, CONCENTRATED

72 Days

Plants are stocky without tendrils. The majority of pods are set in the lower portion of the plant. Pods and seeds are slightly smaller than Regular Fordhook. Very prolific. Seed: Creamish green and light green.

CANNING & FREEZING VARIETY

FORDHOOK 242 BUSH

70 Days

A top ranking All-American vegetable. Similar to Regular Fordhook but pods are shorter and uniformly curved. Most pods contain four seeds that shelled are identical to regular Fordhook. 242 has outstanding ability to set under adverse conditions, particularly in high temperatures. Excellent quality. Recommended for freezing. Seed: Creamish green and light green.

HENDERSON BUSH

65 Days

Bush 16 inch, erect, runnerless, dark, glossy green. Pods 3½ inch, curved, flat, dark green with 3 to 4 beans. Seed: Small, white, flat.

CANNING & FREEZING VARIETY

IMPROVED EARLY THOROGREEN BUSH

65 Days

Bush 16 inches, erect, runnerless, dark, glossy green. Pods 3½ inches, curved, flat with 2 to 4 beans. Same habits as Henderson Bush, except for distinguishing feature of green cotyledons. Seed: Green except for lighter shades bleached.

CANNING & FREEZING VARIETY

BEANS—BUSH LIMA

Clarks Bush Lima Bean Production, Caldwell, Idaho

SWEET CORN

DR. FRANKLIN L. BLANKENBURG

Hybrid sweet corn research, Caldwell, Idaho

BURBANK BANTAM

84 Days

Ears 7 to 8 inch, with 12 to 14 rows of deep, yellow kernels. Equal in flavor to 8 row Bantam. Stalks 5½ to 6 feet. Produces well under adverse conditions. Among the best of the open pollinated varieties for garden and market.

SWEET CORN

CARMELCROSS (Hybrid)

75 Days

Ears 7½ inches, 12-16 rows broad, medium depth yellow kernels. Stalk 5 to 5½ feet. An early mid-season, widely adapted hybrid giving a high yield of good quality corn for market garden and for early canning and freezing. Originally released by the Connecticut Experiment Station.

COUNTRY GENTLEMAN

95 Days

Ears, 7 to 8 inches. Deep, white, slender, kernels with no row formation. Tender, sweet, excellent flavor. Small cob. Flag leaves. Stalk 6½ to 7½ feet. Used primarily for home gardening.

COUNTRY GENTLEMAN ILL. NO. 13

COUNTRY GENTLEMAN ILL. No. 13 (Hybrid) 95 Days

Ears 8 inches with narrow, deep, white kernels. Stalk 8 to 8½ feet. Has white interior silk and excellent holding qualities. A high yielding, top quality Country Gentleman Hybrid developed by W. A. Huelsen of the University of Illinois.

SWEET CORN

GOLDEN BANTAM 8 ROWED

82 Days

Ears 6 to 8 inches with 8 rows of kernels of finest flavor and sweetness. Usually produces two ears per stalk. Stalks 5½ to 6 feet. An excellent selected strain. Hardy and well known.

GOLDEN BEAUTY

1955 ALL AMERICA SILVER MEDAL WINNER.

GOLDEN BEAUTY (Hybrid)

70 Days

A new early, yellow market and home garden hybrid introduced by Mr. W. H. Lachman of the University of Massachusetts.

Stalks 5 feet. Ears 7-8 inches long and slightly tapered, with 12-14 rows of medium width, good yellow, kernels. This hybrid yields well and has good quality factors. Maturity is approximately a day earlier than Marcross.

SWEET CORN

GOLDEN CROSS BANTAM (Rogers)

GOLDEN CROSS BANTAM (Hybrid)

88 Days

Ears 8 to 8½ inches with 12 to 14 rows of golden kernels. Sweet and tender. Heavy yielder, resistant to wilt. Very uniform. Stalk 6 to 6½ feet. A hardy top quality corn. The foremost yellow hybrid on the market today. Very wide range of adaptability. Used for garden, market, canning and freezing. Developed by Glenn M. Smith of Purdue University and the U.S.D.A.

SWEET CORN

GOLDEN EARLIPAK

GOLDEN EARLIPAK (Hybrid 52A)

74 Days

Developed in our breeding program for first early canning and freezing use, but equally suited for market planting. Especially adapted to areas where short growing season precludes use of slower maturing hybrids.

Stalk 6-6½ feet. Ears 8½-9 inches, predominantly 12 rows and with tender and sweet kernels of medium depth and good yellow color. A good yielding early hybrid adapted for mechanical harvesting.

GOLDEN HARVEST (Hybrid)

88 Days

A new yellow hybrid developed by Glenn M. Smith of Purdue University and the U.S.D.A. Very similar in plant, ear type, kernel character, yield and season to Golden Cross Bantam, but has important advantage of white silks inside husks. Ears are more cylindrical, filled better at ear tips and straighter rowed than Golden Cross. High percentage of perfect ears for corn-on-the-cob pack.

Very uniform 8 inch ear, 12-14 rows. Kernels medium width and depth. Stalk 6½-7 feet. For garden, market, canning and freezing.

SWEET CORN

GOLDEN NUGGET

GOLDEN NUGGET (Hybrid)

88 Days

A Rogers introduction for the canning and freezing trade. A high yielding midseason, yellow hybrid of exceptionally good quality.

Stalk $7\frac{1}{2}$ to 8 feet, 1 to 2 tillers, ears borne well up from the ground level for ease of harvesting. Easy snapper. Ears 8 to $8\frac{1}{2}$ inches, cylindrical, 12 to 16 good uniform rows, long husk cover. Kernels medium yellow, medium width and depth, very tender and sweet.

GOLDEN HYBRID G101

71 Days

This new hybrid maturing in Marcross season offers a combination of high yield and improved flavor and tenderness seldom found in an early corn.

Stalks 6 feet, sturdy and with few tillers. Good tolerance to bacterial wilt. Ears $7\frac{1}{2}$ -8 inches, mostly 12 rows and with long husk cover of medium green color. Attractive husked ear appearance. Kernels good uniformity, glossy yellow color, medium width and depth.

Normally will produce two good ears per plant. Adapted for use as an early home garden, market, canning and freezing corn.

SWEET CORN

GOLDEN HYBRID G101

HOOSIER GOLD (Hybrid)

84 Days

A new heavy yielding yellow hybrid developed by Glenn M. Smith of Purdue University in cooperation with the Bureau of Plant Industry, U.S.D.A. Normally 3 to 5 days earlier than Golden Cross Bantam.

Stalks 5½ feet, 2 to 3 tillers. Ears 8 to 9 inches, 12 to 14 rows of medium depth, light yellow kernels. Very good flavor and tenderness. Holds quality well. Long, dark green husk and flag leaves make excellent market appearance. A promising hybrid for early canning, market and garden use.

IOANA (Hybrid)

89 Days

Ears 8½ inches, very uniform, cylindrical, with 12-14 straight rows of medium width, light yellow kernels of excellent quality. Sturdy 7-7½ foot stalk with few tillers. A high yielding hybrid for canning and market gardening. Developed and released by Dr. E. S. Haber of Iowa State College.

SWEET CORN

IOCHIEF

IOCHIEF (Hybrid)

89 Days

An outstanding yellow hybrid developed by Dr. E. S. Haber of Iowa State College. Iochief has a top rating on basis of yield and cutting percentage. Excellent performance under drought conditions. Good flavor and tenderness.

Stalk 7 to 7½ feet and virtually tillerless. Ears set well up on stalk for ease of harvesting. Ears 8½ to 9 inches long, cylindrical, filled to tips and with 16 to 20 rows of very deep, narrow kernels. A clean silker. Good husk coverage. Holds prime quality well in the field.

High yield, top cut per ton, good color and quality plus refined kernel character combine to make Iochief an ideal canning and freezing hybrid.

LINCOLN (Hybrid)

84 Days

Ears 8 to 8½ inches with 14 to 18 rows, medium narrow kernels. Stalks 6½ to 7 feet, erect, resists lodging and ears borne high. A cross of inbreds P39xC23. Primarily for market gardeners wanting large early ears. Good yielder. Developed by the Connecticut Agricultural Experiment Station.

SWEET CORN

MARCROSS C13x6 (Hybrid)

71 Days

Ears 7 to 7½ inches with 10 to 14 rows of rather large, yellow kernels. Fairly good quality. Stalks 5 to 5½ feet. An early garden and market corn well known in all corn growing areas. A prolific producer. Introduced by the Connecticut Agricultural Experiment Station.

MARCROSS NORTHERN

80 Days

Ears 7 to 8 inches with 12 to 14 rows of medium width, yellow, deep kernels. Sweet, tender. Stalks 5½ to 6 feet. A large eared, early corn for market garden.

Caldwell, Idaho

SWEET CORN

MELLO-GOLD

MELLO-GOLD (Hybrid)

84 Days

Our new development for an early canning and freezing corn. Holds well in the field and gives good cut corn recovery.

Very sturdy $7\frac{1}{2}$ foot stalk with good root system. Very few tillers. Lodging resistant and drouth tolerant. Ears $8-8\frac{1}{2}$ inches. 12-16 rows of medium width, bright, glossy yellow kernels of good quality. Yields well. Very tolerant to Stewart's Wilt.

NARROWGRAIN EVERGREEN ILL. 14x11 (Hybrid)

93 Days

Ears 8 inches with 18 to 22 rows of deep, slender, white kernels of fine quality. A few flag leaves. Stalk 8 feet. Good yield. Produces a more refined kernel than 14 x 13. Originated by W. A. Huelsen of the Illinois Agricultural Experiment Station. A garden and canning hybrid.

SWEET CORN

NARROWGRAIN EVERGREEN ILL. 14x13 (Hybrid)

93 Days

Ears 8 inches with 16-20 rows of very deep, medium width, white kernels. A good quality Narrowgrain. Few flag leaves. Stalk 8 feet, well rooted. A high yielding canning hybrid. Originated by W. A. Huel- sen of the University of Illinois.

PROSPECTOR

PROSPECTOR

89 Days

A new, prolific, golden hybrid developed for the market and processing trade. Has high cutting per- centage and attractive, refined kernel character.

Stalk 8-8½ feet, few tillers. Ears 8-8½ inches, 14-18 rows, uniform and with long husk cover. Kernels me- dium yellow, narrow, deep and of good quality. Normally produces two good ears set well up from ground for easy harvesting.

SPANCROSS (Hybrid)

66 Days

Ears medium 6 to 7 inches with about 12 rows of yellow kernels. Uniform in maturity and good quality. Stalk 4 feet, stocky, ears set low. Extra early, wilt resistant and somewhat resistant to cold. A first-early garden hybrid originated and released by the Con- necticut Agricultural Experiment Station.

SWEET CORN

STOWELLS EVERGREEN

95 to 100 Days

Ears 8 to 9 inches, 16 rows of deep, white kernels. Stalk 7 to 8 feet with very few suckers. Bred from selected, hardy strains. A high yielding, large eared Stowells for market and gardening.

STOWELLS EVERGREEN (Hybrid)

95 Days

Ears 8½ inches with 16 to 20 rows of medium width, white kernels. Stalk 8 feet with very few tillers. Good quality. Narrower kernels, more uniform in plant type and maturity than open pollinated Stowells Evergreen.

TENDERGOLD

80 Days

Ears 7 to 8 inches with 12 to 14 rows of golden kernels of medium width and depth. Sweet, tender, fine quality. Stalks 5½ to 6 feet. A hardy strain of satisfactory yield for canning, market or home garden.
